Ideco Controller Must Stop Inflation

"This survey details how the dollar has declined 47 cents in value since 1939," he continued, "but as government becomes sounder, so will the dollar—by substituting better production for subsidies, incentives for regimenting controls, trade for aid, and pay-as-we-go economics for deficit financing. In this way we shall build a better America."

"People of Torrance should know that Southern California's share of the federal debt is \$10,379,609,000, and that the Los Angeles County share is \$7,016,351,000," Maher said.

He emphasized that the only effective ways to hold the line against further inflation are strict government economy, stabilization of private credit, and a continuing increase in production by American industry.

"Torrance people can help bring government back home in 1953, reduce taxes and restore value of their dollars, as the past 13-year trend of the Federal government is reversed."

This was the statement yesterday of Donald M. Maher, controller for International Derrick and Equipment Co. of Torrance, after reviewing a study by the Pacific Southwest economic research council of the National Association of Manufacturers.

Postal Transportation Clerk Tests Scheduled

An examination to substitute postal transportation clerk in California and several other states was announced this week by the United States Civil Service Commission, according to T. C. Messerve, local secretary of the commission.

Men between the ages of 18 and 50 may obtain full information and application forms from Messerve at the Torrance post office.

Reflections

By J. HUGH SHERFFEY, JR.

TWO SIDES OF FEAR

When trouble seems sinister is when it is like a wave about to crest, towers above you, ready to submerge you, with tons of water, yet that wave, because it is big, can be ridden to shore. The bigger the wave the more power it has; the greater your fear of what might happen the more ominous it seems; but spend as much time in resolving it as you do in fear of it and it will carry you, on top and safely to shore.

Our imagination is a cruel trickster, it builds ogres out of shadows, shuts off the light of reason and makes hideous shapes on the wall of our mind, it erects signs, "Be afraid here," "Run here," "Wall here," and stands aside to laugh at simple human beings and their fear.

We can be the duke of fear or its master. Where there is peace on the other side, Turn your troubles over, there you'll find the answer, and happiness.
